BnPP-Fortis Use Case**

Mr. Jan De Blauwe, Head of Information Security and Risk Management, BNPP-Fortis
BNPP-Fortis has launched an initiative to structurally improve the management of logical access rights. The strategy will deliver on four business objectives and here we will explore the approach, solution, success factors and lessons learnt:

03:30 to 04:00 p.m **Coffee Break**

04:00 to 04:30 p.m **SAM Password Management**

SAM Password Reset Selfservices vs. Password Synchronisation and SAM eSSO to improve user performance/convenience and to reduce helpdesk calls/costs
Kjell Carlsson, Business line IdM - Northern Europe

04:30 to 05:00 p.m **SoD – Policy Enforcement with the rule engine**

How to configure SoD for roles and accounts with SAM Enterprise
Examples on how to use the Rule Engine for compliance purposes
Roland Awischus, IdM Consulting

05:00 p.m **Q&A Session**

07:00 p.m **Gala Dinner, Restaurant Belga Queen**

Risk posture – improving control whilst strengthening compliance

Efficiency – reducing costs and implementing automated end-to-end provisioning

Effectiveness – improving quality by aligning people, process and technology

Flexibility – supporting organizational changes and application evolution

[SAM Identity Management Forum]
