Hartmut Bolten takes over the management of Auconet GmbH

Berlin, 21. January 2019 – Auconet GmbH has appointed Hartmut Bolten as its new Managing Director. The experienced computer scientist will take over the management of the company.

Together with his team, Hartmut Bolten will systematically expand the company's market position and further advance its technology. The aim is to win new international customers and to develop synergies within the Beta Systems Group. The appointment of Hartmut Bolten as Managing Director is an important signal of continuity for Auconet customers, partners and employees.

Hartmut Bolten has more than 20 years of management experience with a focus on software development in telecommunications, network management and network security at leading companies such as Alcatel and Tieto. He has worked for Auconet GmbH for 11 years, the last 10 of which as development manager.

"I am looking forward to this new and exciting challenge and the further cooperation with the very experienced and qualified employees of Auconet. Together with new sales partners we will initiate the next growth phase at Auconet", said Hartmut Bolten.

Auconet BICS monitors and controls heterogeneous networks from a central location. This ability to operate BICS redundantly in a multi-instance network and with a large number of clients ensures the BICS solution can successfully manage very large network environments. As a result, this makes BICS an indispensable solution for companies on a global scale.

About Auconet

Auconet was founded in 1998 by a German engineering team with deep expertise in IT Operation Management. The company provides information technology solutions and offers network management, network security, IT infrastructure management, cloud, network automation, and business infrastructure control solutions.

Auconet BICS is the Next-Generation ITOM platform to control large & heterogeneous enterprise networks. BICS not only provides network infrastructure management for all vendors' devices and endpoints, but also serves as the foundation for a new generation of IT infrastructure management.

Auconet became part of Beta Systems Group in early 2018.

About Beta Systems DCI Software AG

Beta Systems DCI Software AG has been developing high-quality infrastructure software products and solutions for the reliable and efficient processing of large quantities of data for over 35 years, providing our customers with the means to best fulfill all legal and corporate requirements. Our multi-platform software solutions for z/OS, Unix, Linux and Windows environments automate, document and analyze business-critical IT processes in data centers of large corporations, IT service providers, public-sector institutions and mid-sized companies. Beta Systems' data center intelligence portfolio focuses on output management & archiving, log/security information management, workload automation and job management.

Beta Systems Software Aktiengesellschaft (BSS, ISIN DE000A2BPP88) was founded in 1983, is listed in the Scale segment of Deutsche Börse and employs more than 300 people companywide. Company headquarters are located in Berlin, Germany. The company, together with its self-owned subsidiaries and numerous partners, is active across the globe. More than 1,000 companies worldwide use products and solutions from the Beta Systems Group, one of the leading medium-sized and independent software providers in Europe.
